IN THE UNITED STATES PATENT OFFICE

Serial No. 09/713,056

Filing Date: 11/16/2000

Inventor:

Eli Brown

Invention: Iron Cover

Group Art 3728

Examiner: David T. Fidei

SECOND AMENDMENT

Commissioner of Parents

Washington, D.C. 20231

Sir:

Please amend the above application as follows:

In the Drowings

Please enter the utached formal drawings.

REMARKS

The Phal Office Action dated April 19, 2002 has been reviewed. Applicant concurs with the allowances of Claims 3 through 7, as amended. Formal drawings are submitted in response to the paragraph I patification requirement.

Applicant respectfully traverses the Examiner's rejection of Claims 1 and 2, as amended, under 35 USC 102 on the grounds that "Nowhere does applicant use the words "non-transmitting hear" nor do they make it clear the liner is only to be a "non-transmitting heat" liner. The Examiner's statement that applicant is now urging something different than what was originally put in the specification to describe the meets and bounds of the claims subject matter to avoid prior art is not correct. Applicant has specified from the inception an iron cover having a "nontransmitting heat resistant" liner throughout the claims and specification. See for example:

- 1. The second line of claim I refers to "a non-transmitting heat resistant liner"
- 2. The second line of allowed Claim 3 refers to "a non-transmitting heat resistant liner"
- 3. The second fine of allowed Claim 5 refers to "a flexible non-transmitting heat resistant liber"
- 4. The fifth line of the last paragraph on page 7 of the Specification states, "It [the iron cover] also prevents direct transmission of heat from the iron, and allows hot irons to gradually coul during storage.
